Image: Indoor application example

For elegant, surprising, and very melodious music enjoyment—outdoors and indoors.

A special loudspeaker. Easy to use and connect. For indoor use, e.g., in the living room or entrance area, as well as outdoor use, e.g., on the terrace or by the pool. Thanks to powerful and invisibly placed Invisible Speakers from Revox, the sides of the high-quality and highly decorative plant pot are used for impressive sound reproduction. The Botanic is handmade from fiberglass and, thanks to the special material properties, is stable, dimensionally stable, and weatherproof.

Now available as a special audio solution for private homes, hotels, restaurants, and public buildings.

NOTE:

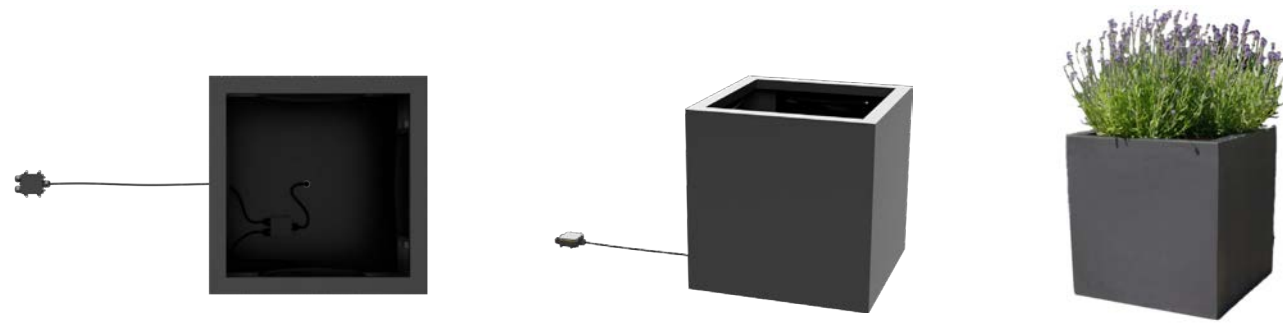

The Revox Botanic is available as an indoor or outdoor version in two sizes, each in different designs (see technical data).

OUTDOOR

- Housing has drainage holes for standing water – additional holes can be drilled
- Invisible speaker with special grommet to prevent standing water from entering
- External IP connection box for the speaker cables
- Side walls reinforced with waterproof housing – this prevents pressure from plants

INDOOR

- Housing without drainage holes
- Central waterproof PG screw connection for cable outlet
- Invisible speaker with special grommet to prevent standing water from entering
- Base plate with additional moisture storage space under the PG screw connection
- Base plate completely waterproof, making it suitable for all floor coverings
- Reinforced side walls with waterproof casing – this prevents planting pressure

PLANTING

For indoor planting, please note the following:

It is important to plant flower pots without holes correctly to prevent waterlogging and root rot. A drainage layer is essential for this.

Details:

1. Drainage layer:

Place a drainage layer of expanded clay at the bottom of the pot. This layer ensures that excess water can drain away and the roots do not stand in water for too long. The layer should be about 1-2 cm thick, but it can be thicker for larger pots.

2. Fleece:

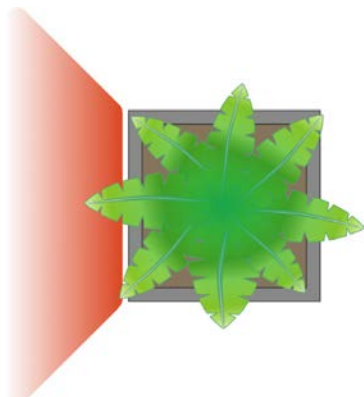

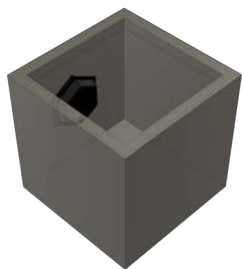

Place a fine fleece or fine mesh over the drainage layer to prevent soil from entering the drainage system.

3. Soil:

Fill the pot with suitable potting soil and plant the desired plant.

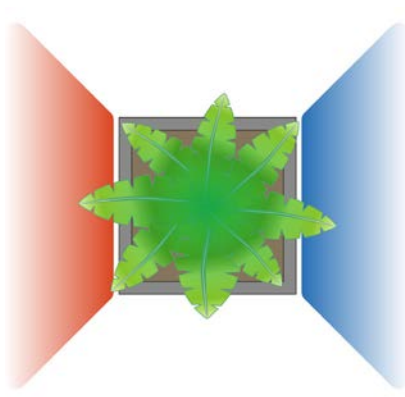

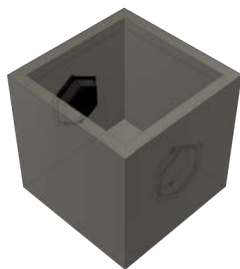

4. Watering:

Make sure that the plant is not watered too often, especially if the planter does not have a drainage hole. A water level indicator can help here – we recommend using one.

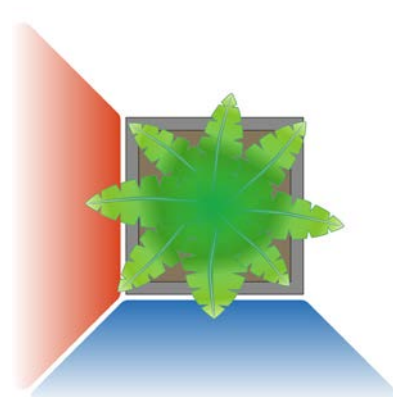

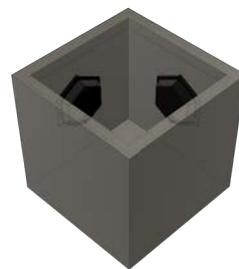

Botanic 50-1

Plant pot (50x50x50cm) with an Invisible Speaker on one side.

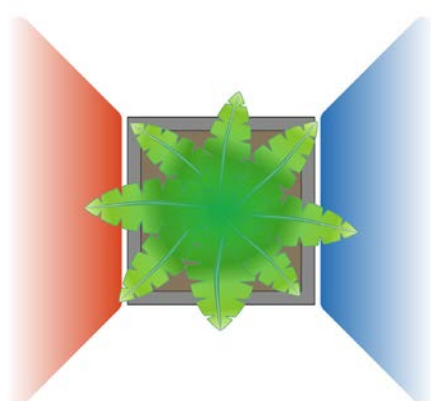

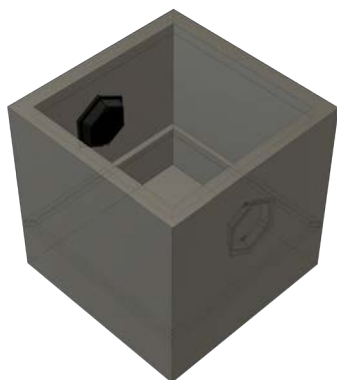

Botanic 50-2o

Plant pot (50x50x50cm) with two Invisible Speakers opposite each other.

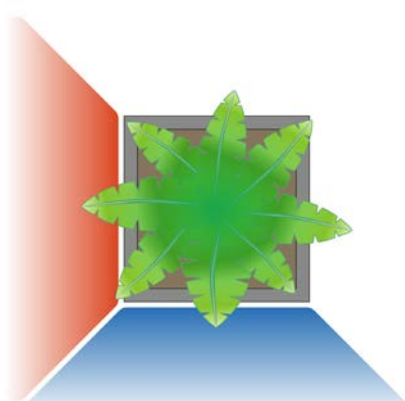

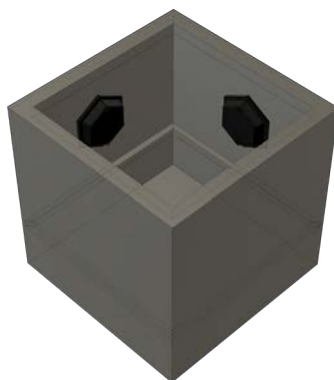

Botanic 50-2c

Plant pot (50x50x50cm) with two invisible speakers across the corner.

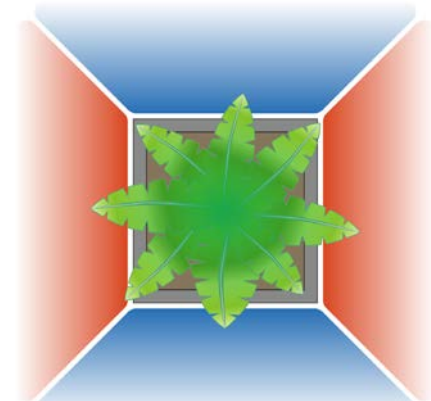

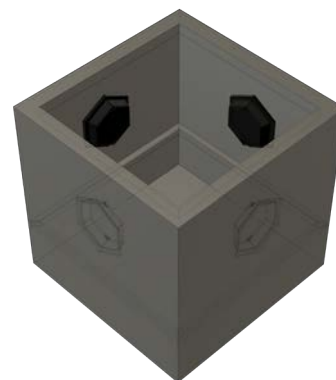

Botanic 70-2o

Plant pot (70x70x70cm) with two Invisible Speakers opposite each other.

Botanic 70-2c

Plant pot (70x70x70cm) with two invisible speakers across the corner.

Botanic 70-4

Plant pot (70x70x70cm) with four invisible speakers on all sides.
