

Revox

True studio sound quality

Revox Joy Remote Control S208

Operation must be simple! This was the premise behind the S208 system remote control for the Revox product range. The elegant remote control with subtly lit buttons and a colour display controls the Joy family in a truly simple and intuitive manner, as it does other audio devices and your television. Multiple operating steps can be bundled together into a single press of a button using programmed macros (commands). The smart S208 from Revox puts you in control of your entire entertainment system with a single remote.
